

SAI KHUSHAL

Software Engineer | Java Developer | ML Enthusiast
khushalsai@gmail.com | +91 8317397204 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Undergraduate in Computer Science with an interest in Software Development and Machine Learning. Proficient in Java, Python, and Backend Technologies. Fast and flexible learner that learns better by practical application and projects rather than theoretical approaches. Excited to learn about new technologies and to build robust software applications.

EDUCATION

VIT – AP University

Bachelor of Technology (B.Tech) in Computer Science and Engineering with specialization in Data Analytics
Grade: 8.75/10.0 | September 2024 – Present

TECHNICAL SKILLS

Programming Languages: Java, C/C++, Python, R

Cloud Systems: AWS, Google Cloud Platform (GCP)

Developer Tools: Git, GitHub

Data Analysis: NumPy, Pandas, Seaborn, Matplotlib

Databases: SQL, MongoDB, Redis

Machine Learning: TensorFlow, Scikit-learn

PROJECTS

GestMo ([GitHub](#))

Gesture-controlled media player using real-time hand landmark detection

- Built a gesture-controlled media player that lets users control playback system-wide using only hand gestures in front of a webcam, with no keyboard or mouse.
- Used MediaPipe to detect hand landmarks in real time and analysed finger states to classify gestures such as fist, open palm, thumbs up, pointing, and peace sign.
- Added debounce and stability checks to filter out accidental triggers before an action is fired.
- Mapped recognised gestures to system-wide media key actions (play/pause, volume, next/previous track) via PyAutoGUI, working across any media player.

RAT (Remote Audit Tool)

- Built a portable forensic auditing tool using PowerShell and Raspberry Pi USB Gadget technology.
- Automated collection of system, network, USB, and login history data from Windows machines.
- Generated zero-dependency HTML reports without installing software on the target system.
- Implemented modular scripts for network forensics, USB analysis, and system auditing.

OPEN SOURCE CONTRIBUTION

Checkstyle is a development tool to help programmers write Java code that adheres to a coding standard. By default, it supports the Google Java Style Guide and Sun Code Conventions, but is highly configurable. It can be invoked with an ANT task and a command line program. 4 PRs merged, participated in Google Summer of Code 2026.

Worked with Git and GitHub workflows including branching, pull requests, issue tracking, and code reviews.

ACHIEVEMENTS & ACTIVITIES

- Completed Google Study Jams 2025–2026.
- Active participant in collaborative development and coding projects.
- Interested in backend systems, software architecture, and ML applications.
